PHARAON INDUSTRIAL

DUST REMOVAL SPECIALISTS

BEFORE

AFTER

Using state of the art lift equipment and specially designed long reach vacuum systems, dust is contained and removed to create a safe, healthy and environmentally friendly workplace.

PHARAON HOLDINGS WELCOMES YOU TO A NEW CHAPTER IN THE NEVER -ENDING SEARCH FOR WORKPLACE IMPROVEMENTS.

In this day and age it is vital to business survival and positioning to offer the best workplace environments possible.

De-risking expenditure in workplace environments is now seen as a long term investment for progressive and modern thinking companies.

Whether it's a one off cleanup or an ongoing work program, Pharaon Holdings is able to offer you the best solutions and value.

CREATING SAFE, HEALTHY AND ENVIRONMENTALLY FRIENDLY WORKPLACES THROUGH DUST REMOVAL

HEALTH

Less down time and more productivity. Airborne particles that can cause lung and throat cancer are removed. Dust is a major respiratory hazard and inaction can result in serious consequences leading to fines.

FIRE HAZARDS

Explosions and out of control fires - don't let this happen to your factory or warehouse. Secure lower insurance costs and avoid financial losses.

EMPLOYEE MORAL POSITIVE IMAGE

Give your customers the right impression with a clean plant. Send a message to workers. Clean work place environments, make people more motivated and productive.

EQUIPMENT MAINTENANCE

Lower maintenance expenses result by removing dust and extend the longevity of equipment.

SERVICES

DECONTAMINATION WORK

Includes Asbestos dust vacuuming using our special performance H class vacuums.

We use advanced specialist equipment supplied by SMH, the world leaders in providing "Decontamination at work" safety equipment.
No job too small and no job too big.

MACHINERY CLEANING

Includes all plant within factories. This is a specialist area of work to ensure that there is no contamination of products on premises. Techniques have been developed to ensure optimal results.

AIRCONDITIONING CLEANING

Includes plant rooms and ducting. We also provide a full service for filter cleans/replacements on a regular basis.

SILO / TANK CLEANING

Confined space access for the cleaning of silos, tanks and other storage media. This applies to treated water tanks, food and grain silos. Our vacuums are designed to remove the last traces of any residual clean-down sludge or dust.

PRESSURE CLEANING

Exterior or interior we are able to chemically clean building envelopes while safely disposing of liquid waste

ROOF CLEAN-UPS

Spills need cleaning for safety and lost productivity.

PRINCIPLES

COMPLIANCE

Your work place becomes fully compliant and all work is executed to WH&S guidelines at all times.

QUALITY

Combined with your company we have a commitment to excellence.

SAFETY

All work is compliant to worksafe standards. All cleaning products and services are tailored to suit the job and reflect compatibility with plant, environmental and worksafe concerns and guidelines.

MANAGEMENT PLAN

Every job is formulated with a safety management plan. This plan is reviewed with the partner and used in conjunction with the hazard identification form to ensure that work is carried out proficiently and safely. All work and workers comply with WH&S guidelines at all times.
